ERR App · November 2026 edition

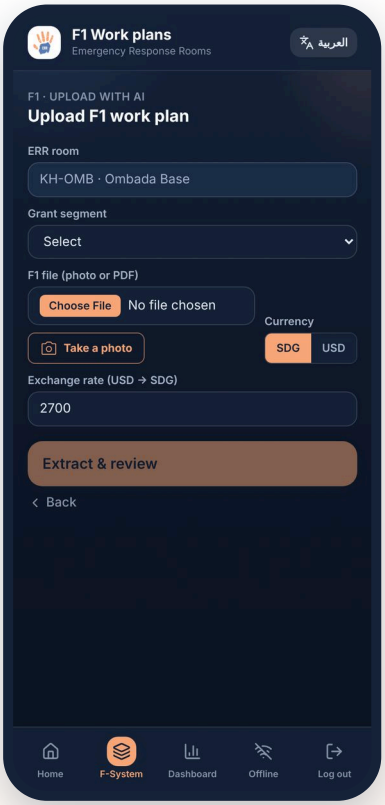

User guide

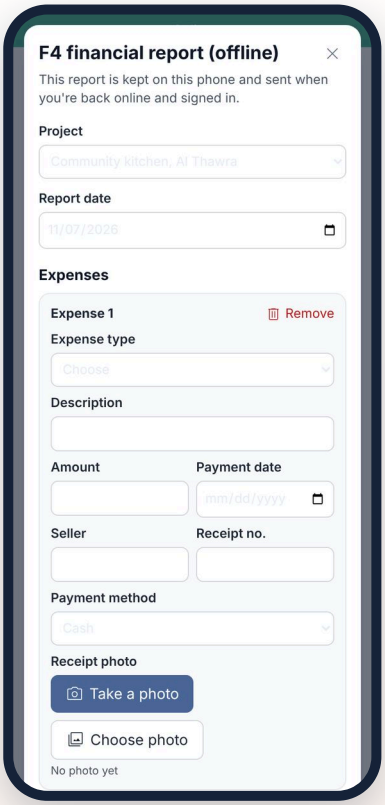

How to submit work plans, follow screening and contracts, and send financial and program reports, even with no internet.

Who this guide is for

- Base, locality and state Emergency Response Rooms
- State representatives on the screening committee (F2)
- Members of the Project Working Group
- Program, finance and reporting officers of each room

The F-System in brief

F1	F2	F3	F4	F5
Work plan & budget	**Project screening**	**Contract (MOU)**	**Financial report**	**Program report**
Room	State representatives	Room & partner	Room	Room

F1 → F2 → F3 → F4 → F5

1 Open the app safely

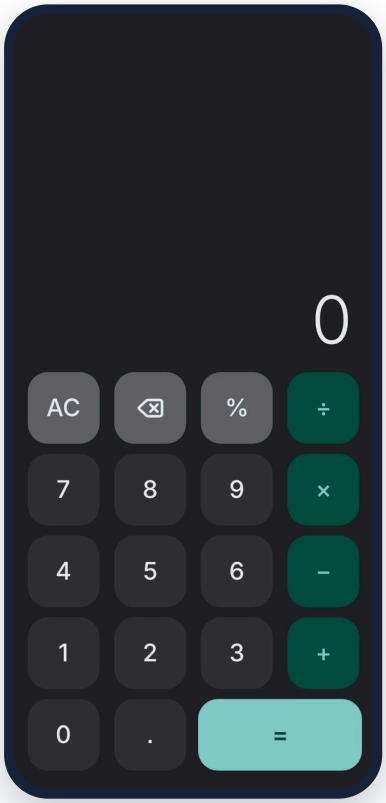

The app looks like a calculator to protect you. It only opens with the secret code.

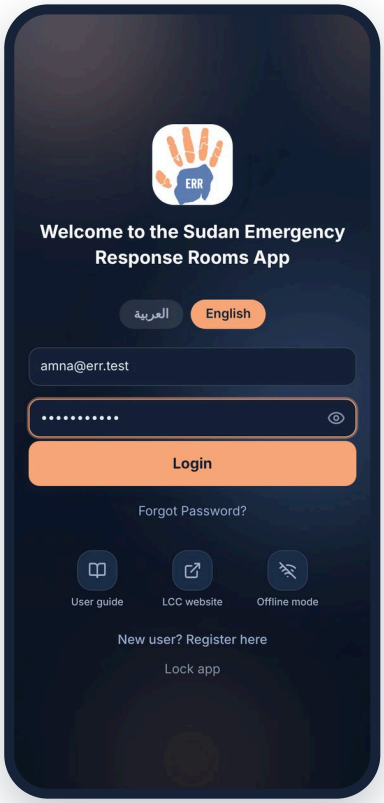

1. Open the app: you see an ordinary calculator.
2. Type the secret code and press = .
3. On the sign-in screen pick your language, enter your email and password, and press "Login".
4. Forgot your password? Press "Forgot Password?" and a link is sent to your email.
5. If you are a room officer, the app asks for your signature the first time. You can press "Later".

Tip

Never share the secret code or your password.

When you finish, press "Log out": it clears your data from the phone and returns to the calculator.

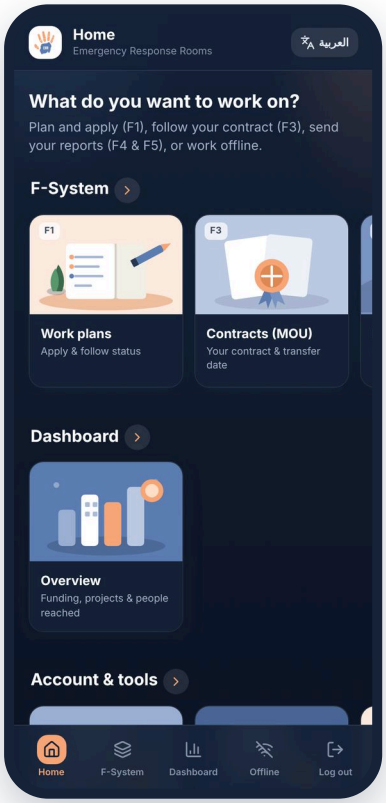

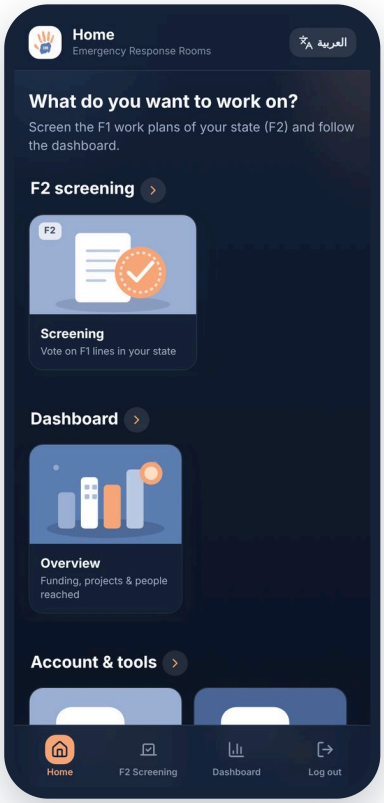

2 Home

Everyone sees only what they work on.

1. Rooms: work plans F1, contracts F3, reports F4 & F5, "Waiting for my signature" and offline mode.
2. State representatives: project screening F2.
3. Project Working Group: "Our projects" after screening.
4. Everyone: dashboard, my account and feedback.
5. The bottom bar: Home, F-System, Dashboard, Offline and Log out. The "English / العربية" button at the top changes the language.

> **Tip**
>
> On a computer, pick "Computer layout" at the top to get the side menu.

3 F1: Work plan

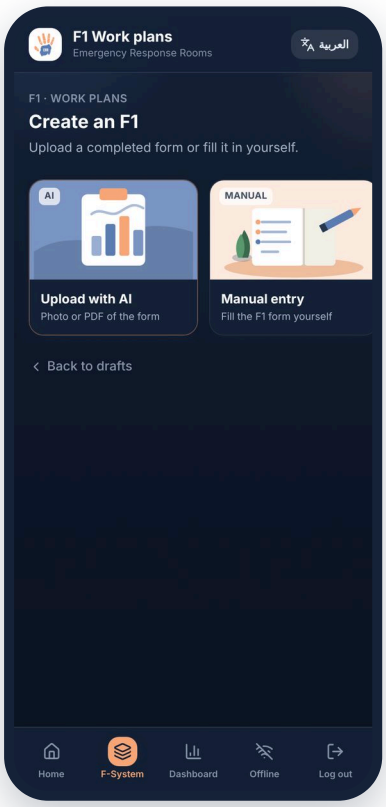

Submit a new work plan for your room: type it, or take a photo of the paper form and let the app read it.

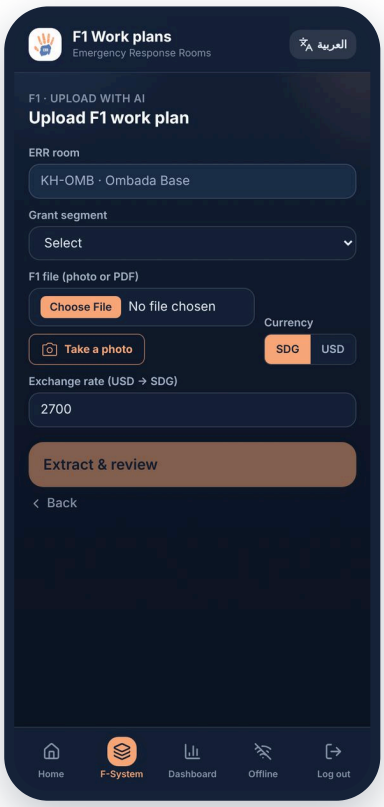

1. From Home press "Work plans", then "New work plan", then "Create an F1".
2. Choose "Manual entry" to fill in the form, or "Upload with AI" if you have the form on paper or as a PDF.
3. To upload: choose the grant segment, add a photo or PDF (or press "Take a photo"), enter the exchange rate and press "Extract & review".
4. Check every field the app read, fix anything wrong, make sure the activities have the number of individuals, then press "Submit F1".
5. Drafts are saved, and you can go back to them from "Drafts".

Tip

Accepted files: photos (JPG, PNG or WebP) and PDF only.

Automatic reading can make mistakes. You are responsible for checking before you submit.

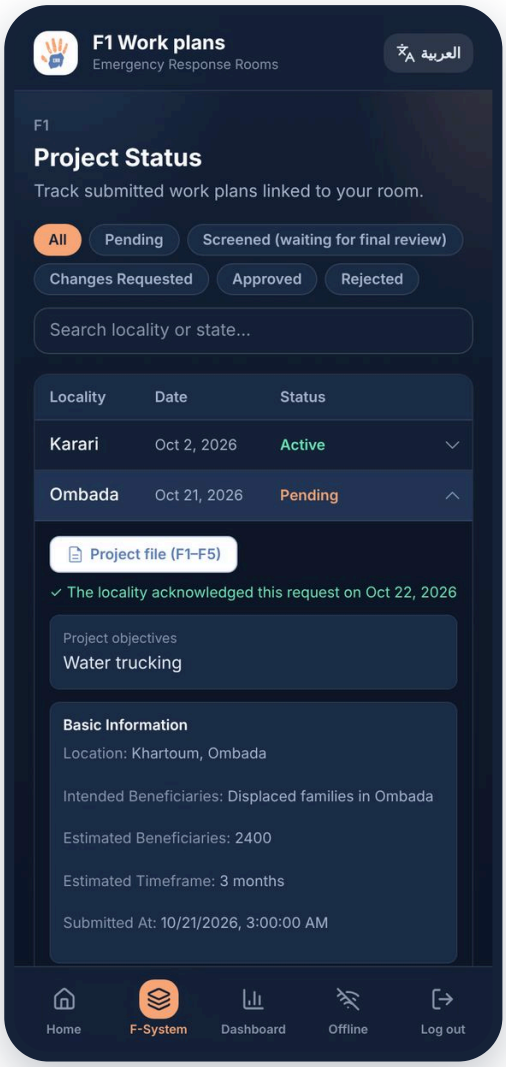

4 Follow your work plan

"My work plans" shows where each plan is.

1. "Pending": received and waiting for screening. The locality confirms it has seen it.
2. "Screened": screening is done; waiting for the final review and the Project Working Group.
3. "Changes Requested": read the note, press "Edit Project" and send it again.
4. "Approved", then "Active": the contract is made and the project is running.
5. Tap any row to see the details and the project file (F1 to F5).

> **Tip**
>
> Locality rooms see an "Acknowledge" button on their rooms' plans.

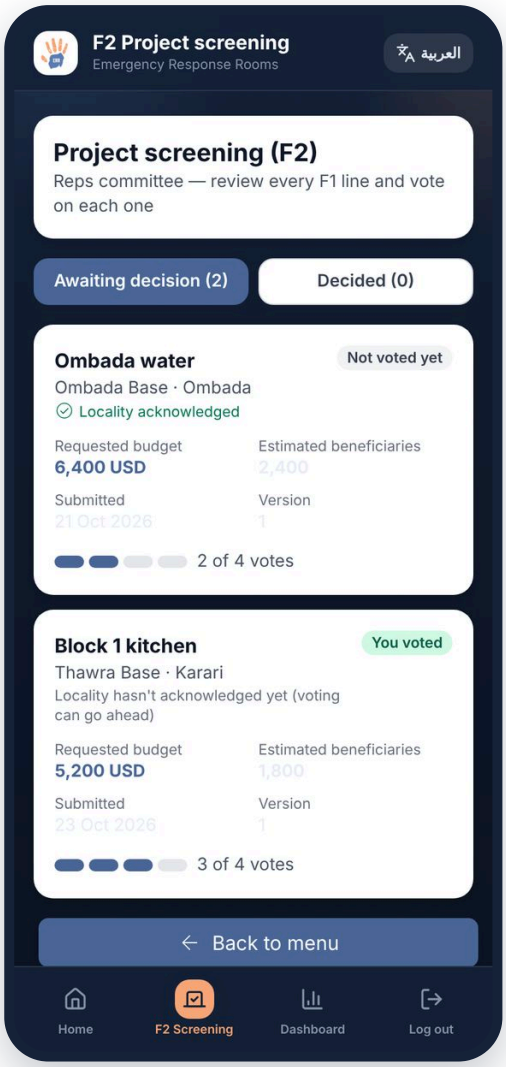

5 F2: Project screening (state representatives)

The representatives committee reviews every work plan in the state and votes on each line.

1. From Home press "Screening".
2. Under "Awaiting decision" open a project and review its lines, budget and number of people reached.
3. Vote on each line, add a note if needed, and press "Submit my vote".
4. The decision is made when the quorum is reached, and appears under "Decided".

> **Tip**
>
> You cannot vote on projects from your own locality.

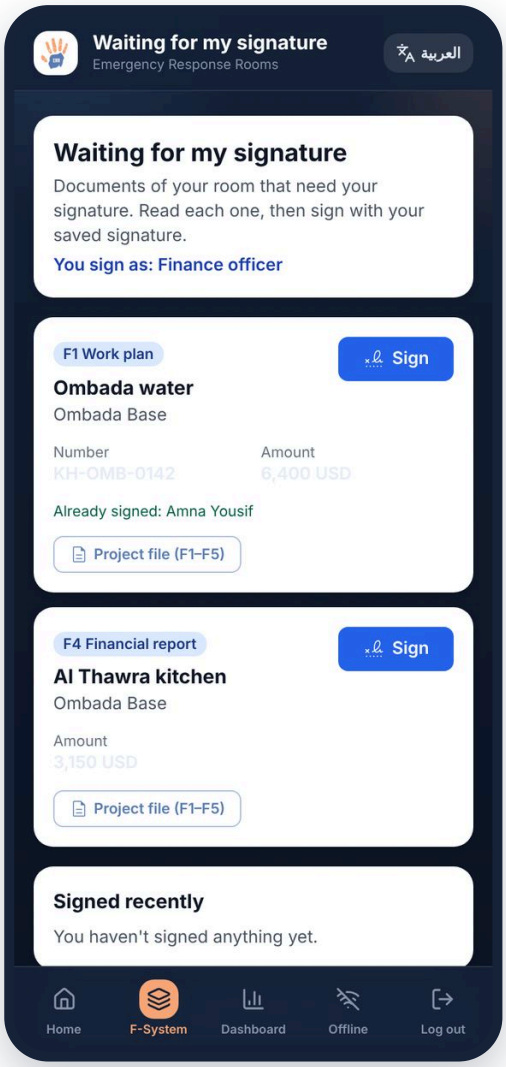

6 F3: Contract and signatures

Room officers (program, finance, reporting) sign F1, F3, F4 and F5 in the app.

1. Save your signature once, in "My account".
2. From Home press "Waiting for my signature": the number on the card is how many documents wait for you.
3. Open the project file, check it, and press "Sign".
4. "Contracts (MOU)" shows your project's contract and transfer date.

> **Tip**
>
> Your signature is stored with your name, position and the date you signed.

7 F4 & F5: Reports

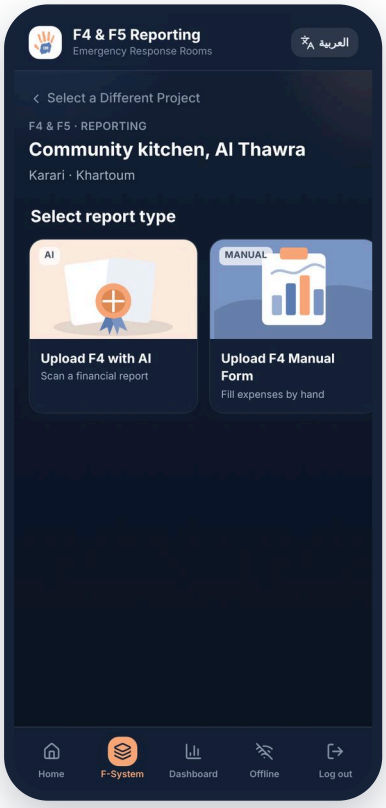

After the transfer, the room sends the financial report (F4) and the program report (F5) for each project.

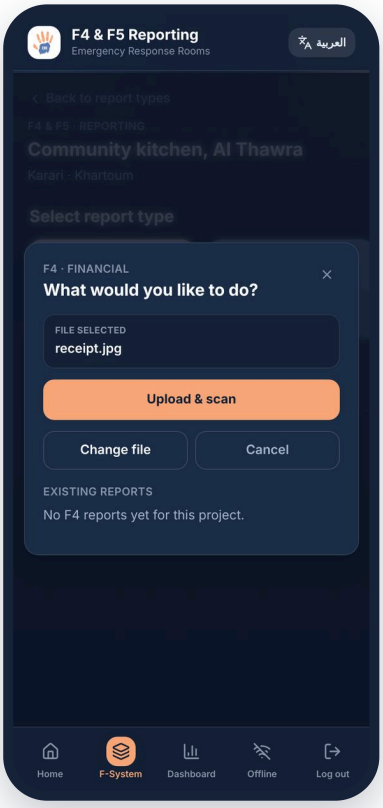

1. From the F-System press "Reports" and choose the project.
2. Choose "Upload with AI" if the report is on paper, or "Manual form".
3. Add a photo or PDF, or take a photo with the camera, and press "Upload & scan".
4. With your finger, mark each part the app asks for: the table, the questions and the receipts for F4, or the activities and people reached for F5.
5. Check the details, confirm the receipt check, and press "Submit report".

Tip

Zoom in or use full screen for small writing.

Saved reports are under "Drafts".

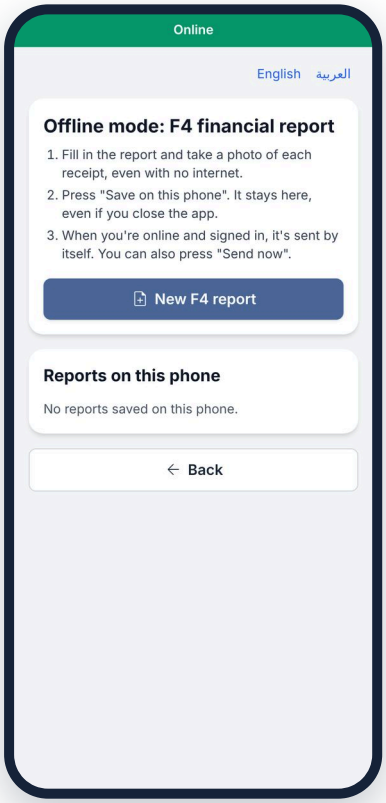

8 Working with no internet

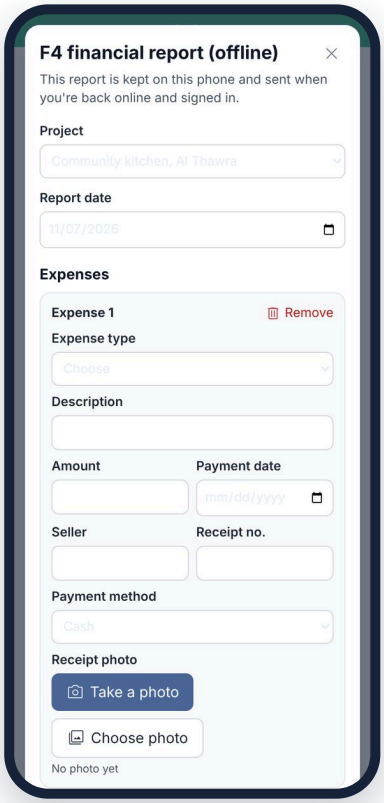

You can write the financial report (F4) and photograph the receipts even with no internet.

1. Open the app once while online so your projects are saved on the phone.
2. With no internet: press "Offline" in the bottom bar or on the sign-in screen.
3. Press "New F4 report", choose the project, enter the expenses and take a photo of each receipt.
4. Press "Save on this phone": the report stays even if you close the app.
5. When you are back online and signed in, the report is sent by itself. You can also press "Send now".

Tip

The coloured bar at the top shows how many reports are waiting to be sent.

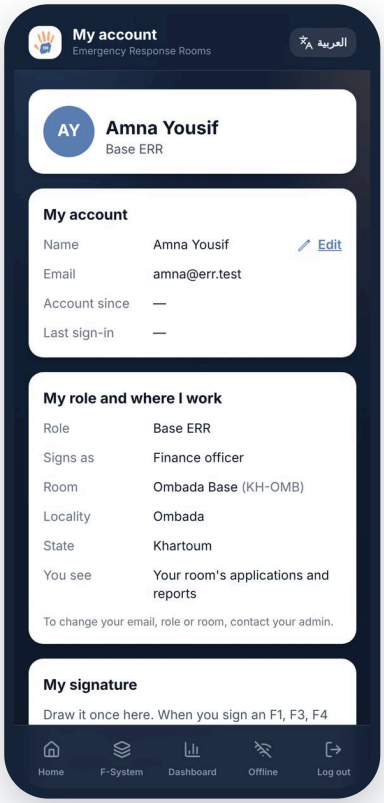

9 Dashboard and your account

The dashboard shows funding, projects and people reached at your level: room, locality, state, or all.

1. Press "Dashboard" in the bottom bar.
2. Press "Print / Save as PDF" to share it.
3. In "My account" you change your name, password and language, save your signature and see your signed-in devices.
4. Use "Feedback" to tell us about a problem or an idea.

Safety tips

- The app is disguised as a calculator. Keep it that way and don't write its name on the phone.
- Log out when you finish, especially on a shared phone.
- Don't share the secret code or your password, and don't take screenshots that show sensitive details.
- If you lose your phone, contact the account manager so they can end your session.

Need help?

Use "Feedback" in the app, or contact the reporting coordinator in your state.
